have been taken hold of in the man-ner I have suggested most substan-tial results are being accomplished. Ophir, I noticed, is beginning to move again as it ought to do, for its posagain as a longit to no, for its pos-sibilities are almost beyond computa-tion; but Dry Canyon, its neighbor, and famous in the early days for the richness of its surface ores, is still as dend as a mackerel.

"I am no longer personally interested in these camps and I am not talking for the purpose or in the hope of gaining anything for myself, but it does appear strange that such a wonderfully rich mineral-bearing region should have been overlooked by the army of bright mining engineers who are constantly on the go looking for good things to present to those for whom they labor. Someone ought to take advantage of the good things that are open in the Dry Canyon-Ophir region."

AT WEST QUINCY.

Will Soon Come,

After a day or two spent at the property in company with D. E. V. Van Norman, one of the heavy shareholders in the company, General Manager G. D. B. Turner of the West Quincy, left for the east last night, leaving the doctor to take the train for his home in i.os Argeies.

With conditions at the property both Manager Turner and Dr. Van Norman are naturally highly elated, and, while it will be a few weeks before the recently encountered ore bodies can receive the attention which the management is anxious to bestow upon them, it will not be long till the lucky shareholders are given substantial evidence ders are given substantial evidenthat their investments have been well made. The contact has been passed through, the drift is now being sent straight for the heart of the company's territory through the lime, and, just as soon as the objective point is reached. the systematic development of the rich ore-bearing channel will be undertaken in earnest. So nicely has every cal-culation made by Manager Turner in the beginning been verified in the work already done that he no longer has a particle of doubt as to the future. Not only have his own theories regardhas the assurance of members of

ELDORADO CANYON ACTIVE.

OPHIR AND DRY CANYON.

Old-Time Operator Cails Attention to Their Possibilities.

One of the old-time operators of this state a few days ago made a trip through the old camps of Ophir and Dry Canyon, Tooele county. He went, not because he still had interests there, for he sold out many, many years ago, but because he wanted to once more size up the hills and note what changes had been wrought since the days when he and his associates cleaned up in the neighborhood of \$2,000,000 from the rich ores that were mined and marketed. Yesterday, after exacting a promise that his name would not be used, he consented to give his impressions of the region and its possibilities.

"While it is now thirty to forty years"

Another Rich Region.

In a similar sense reference can be made to the mineralized mountains twelve miles to the

Vegas a Central Point.

While it is now thirty to forty years since I was operating there," said he, "this trip of mine brought vividly to mind what Dry Canyon and Ophir were doing in those days, and it suggested to me the possibilities that still exist there. I am too old now to think of following mining as a profession again, but if I could I should ask for nothing better than the opportunities that are now simply awaiting the man or combination or men who might be wifling to invest money and introduce modern methods of mining, milling and smelting, as they exist today, in old Treasure hill, for instance.

"In my day the cost of mining and smelting ores was so great that we never thought of touching ores that today would bring as good returns as the high grade material we were then the proposed to the mineral prospects and the mineral prospects that tronopah tonopah-Midway MacNamara Tonopah Extension to the mineral prospects the assertion the center, proposed the prophetic view that ere many years it will be a city of great size. With a city of great size with a city of great size.

Wegas Central Point.

in old Treasure hill, for instance.

"In my day the cost of mining and smelting ores was so great that we never thought of touching ores that today would bring as good returns as the high grade material we were then compelled to confine our operations to. There are miles of old workings in Treasure hill and the country surrounding which I know contain a world of ore that could today be handled at a handsome profit, while development at greater depth than we felt safe in going would undoubtedly reveal riches of which we never dreamed.

"As I wandered over the hills and followed the good roads which we constructed and which are good today; when I saw the wires of the W. A. Clark elecric light and power plant at Tooele running across the hills into Ophir, and again saw the water running through the pipe-line that was laid many years ago by Uncle Matt Gisborn to carry water to the Mono, I could not help but wonder why these valuable accessories to cheap mining and milling were not being utilized by younger men—men in search of a profitable field in which to exert their energies and apply their talents. profitable field in which to exert their energies and apply their talents.

"Stockton is being rejuvenated, and in every instance where the old mines He says that the White Knob smelter is still being run by leasers of the company's property, and that they are compelled to go to Butte for the neces-sary fluxing ores to make the treatment of the mine's product possible.

VISIT ALTA PROPERTIES.

Wyoming Operators May Soon Work Ground Owned by Them.

Engineer P. J. Donohue spent Tuesday at Alta, where he went over property with parties from Wyoming who own ground near the Pittsburg and Pioneer groups, on the divide between Little and Big Cottonwood. He said there was nothing partfeular that there was nothing particular that could be said respecting the visit at this time, though there was a possibility that something would be doing in the not distant future.

Mr. Donohue says the camp of Alta presents a livelier appearance toda; than it has done in many years, and from what is doing and from the in Manager Promises That Glad Tidings quiries he hears concerning the district, he is confident that it is going to spring into prominence again and take its place among the state's big pro-

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$65,400, as follows: Sil-ver, lead, gold and copper ores. \$25,700; base bullion \$29,700; gold bars, \$16,900.

COPPER ON DOWN GRADE

CURRENCY MOVEMENT WEST AND SOUTH.

ant as a whole and reflected general apathy.

The greater part of the day's operations were obviously professional, the early selling movement originating with a trader who was until recently on the long side. Instead of an overdight accumulation of buying orders, many commission houses had orders to sell, and the selling side of the market was taken almost entirely by the trading element. It is not to be defiled that the stocks offered today were absorbed with no outward signs of congestion. At no time was the market active or broad.

The only stock that showed decided strength in the opening dealings was Canadian Pacific. Reading's decline of more than two points was regarded as quite natural in view of the company's poor showing for July. Amalgamated Copper declined on heavy selling by traders who assumed that the end of hostilities in the far east would necessarily curtail the demand for the metal. There was also an increased belief that the recent speculation in metals had reached its limit for a time. Other features of weakness were Union Pacific, St. Paul, New York Central. Pacific, St. Paul, New York Central, Erie, Louisville & Nashville and the

United States Steel issues.

The list drifted along during the early session, but later, on its oversold appearance, traders went in and mough the active issues, bringing partial re-coveries in a number of shares and gains in Erie and United States Steel common. The strength of these stocks, James A. Pollock & Co. furnish the following as the closing quotations on the San Francisco exchange yesterday, over their priyate wire: together with a five-point advance in Pacific Coast, were the only notable features of the final hour, the market showing weakness at the close. There were wide differences between London and local prices at the open-ing here. London probably took 30,000 shares on balance, Rumor was again busy casting up

Rumor was again busy casting up the money needs of the former belligerents, but in quarters where details should be forthcoming it was declared that the day had brought no new developments. It is hardly likely that any foreign loans will be negotiated here until the American crop requirements have been met. On this subject it is not amiss to note the west and southwest continues to draw

Total sales for the day, 893,200 shares.

Revered the effect of yesterday's historic event at Portsmouth found clearer reflection on the stock exchanges of Europe than on our own. London, Paris and Berlin reported a vastly better tone. This was shown in the improved prices for Russian and Japhanese issues, advances in British consoland London's purchase of American securities. The universal gratification expressed by financiers justifies the belief that American's interest in an honorable peace was based on something more than sentimental grounds. The New York market refused, however, to be guided by those abroad. It would serve no distinct purpose to specify the day's movements. Suffice it to say they were unimportant as a whole and reflected general apathy.

The greater part of the day's operations were obviously professional, the early selling movement originating with a treader who was until recently on the long side. Instead of an overdight accumulation of buying orders. Many commission houses had orders to sell, and the selling side of the market was taken almost entirely by the trading element. It is not to be defined that the stocks effered today were absorbed with no outward signs of congestion. At no time was the market active or broad.

GRAIN AND PROVISIONS.

Chicago, Aug. 30.—The wheat market was weak from the start. At the opening Sentember was off %60%c to %60%c, at 80%680%c. The main factor in the situation was the condition of the weather, which was still of the best kind for harvesting the spring sown crop. Reports from northwestern Canada indicated a large yield. This helped to increase the selling pressure. Another weakening influence was a moderate decline at Liverpool. Throughout the day September was

subjected to persistent selling, mostly from pit traders, although a prominent long made liberal offerings. Until late in the day the market lacked any bullish incentive and prices steadily declined. September closed at 30% 20%, and December closed at 30% 20%, and December closed at 30% 20%.

The feature of trading in the corn market was a sharp upturn in the price of the September delivery. Pit traders sold short early in the session on the expectation that the usual eleventh hour liquidation would cause a considerable decline. The market, however, received excellent support from cash interests and commission houses. In consequence, early sellers turned buying during the last half of the session, resulting in a radical advance in the price of September. Distant deliveries were firm in sympathy with the bulge in the price of September. Weather was again favirable for the rapid maturing of the crop and cables were lower. The market closed firm, with September at 53%, a net advance of 14%. December closed 1/3c higher, at 42% 243.

Weakness in wheat had a beartish effect on the oats market. This advantage was of small volume and fluctuations narrow. September closed a shade to 1/3c lower, at 25½, and December at 25½.

The declining tendency of wheat had apparently no effect on the provisions market, which ruled strong all day. The market again received active support from prominent packers. Continued shipping demand belped to support prices. At the close September pork was up 47½, lard, 12½ and ribs, 507½ chigher.

Newbro's Herpicide Destroys the Pes ferous Cause of Annoying Dandruff. ferous Cause of Annoying Dandruff.

Does your head itch? Is your coat of dress full of white flakes after dressin your hair? That's the effect of dandruf. Is your hair thinning? Are you beginnin to get bald in spots? Are you already in fact, rapidly becoming baid? If so that is the effect of a measiy little parasite that burrows in at the root of the hair and throws up the scalp in dandruf and eats off the hair at the root Science's latest discovery is a destroye of that pestiferous germ. That destroye is contained in no other hair preparatio on earth but Newbro's Herpicide. Tr it, and be convinced. A delightful dressing. Sold by leading druggists. Send 19 in stamps for sample to The Herpicid Co., Detroit, Mich.

WHITE FISH IN TODAY

Lake Michigan Catch Will be Retailed at 20c; Changes in Local Market Quotations.

White fish, fresh from the Great lakes, will arrive in Salt Lake this morning and will be placed on the market at 20 cents per pound. The fish comes from Lake Michigan and as it is the first in some time dealers expect a ters are to be had in plenty.

There was nothing new in the vegetable market yestcday as far as receipts were concerned, but there were several changes in prices. Cauliflower advanced slightly, from 12½c to 1½ being asked where 10c has been sufficient. Increased receipts in Caiffornia sweet potatoes sent that variety of spuds from 10c and 7½c down to 5c per pound.

Grapes are now arriving in large

from 10c and 71/2c down to 5c per pound.
Grapes are now arriving in large quantities, that is all excepting the Isabellas. Many of the California varieties, can now be obtained as low as 5c per pound. The Isabellas should begin arriving in about three weeks, they being the late grape on the coast.

Watermelons are coming in in fairly large quantities. Many of the meleas while apparently unpulatable because while apparently unpalatable because the interior is white and not of the rosy red seen in lithographs are quite agree-able to the taste.
